

Addition & Remodel

The owners of this 1918 Lynnhurst neighborhood home had outgrown their space and needed to expand. A two-story addition added approximately four hundred square feet to the rear of the home and gave them a new mudroom, ½ bath and expanded kitchen on the main level with a new master bedroom and bathroom on the second floor. The cramped kitchen was transformed into an open, airy kitchen with white enameled cabinets, granite countertops, and oak hardwood floors to match the existing floors. The addition's exterior is stucco to match the existing home as well as blended roof lines. The cornice, windows and trim were all designed to match the existing home details. Careful attention was given to water run-off with gutters, downspout locations and re-grading the backyard.

Throughout the project, the original character of the house and neighborhood were respected while meeting the needs of the owners.
